TREE PLANTING INDEXED

WINTER AND SPRING

January and February are the great planting months in Texas and the Southwest. March has had largely increased plantings in recent years, and we have had to do considerable landscape planting even in April and as late as June for customers who had "put off."

PLANT NOW IF YOU CAN

Plant the glossy leaved evergreen Japan ligustrums, like those in front of our State capitol, for shades, screens and windbrakes. They live 400 years and never shed a leaf.

Plant elms, sycamores, locusts, ash, liveoaks, evergreens, flowering shrubs, roses and lilies. They give character, comfort and value to your home.

Plant peach trees, plums, apricots, apples, pears, figs, grapes, pecans and berries. The Smith peach is one that has never missed a crop.

The Ramsey Neverfail fig is a wonder first year.

The Haupt berries beat the world on quantity, quality and dollars.

We may trade trees for land in tracts of considerable size. Prefer western acreage or land with wild pecan trees on it.

We might top work large lots of pecan trees for a half interest in the nuts for a period of years.

Sales have been the heaviest the past fall that we have had in several years. Fortunately, we had a large stock to begin with, and shall be able all through the season to supply nearly anything wanted.

We shall always adhere to the policy of having none but satisfied customers.

Trees that die the first season after planting will be replaced at half of catalog price. This divides the responsibility and loss between our buyers and ourselves.

INFORMATION IS GLADLY GIVEN at all times, if we have it. Write us freely.

MAKE YOUR HOME GROUNDS BEAUTIFUL

Never before have people been so interested in improving the appearances of their grounds and yards, in keeping with the interior of their homes, as they are now.

This is proper. But few persons see the inside of your home, but every passer-by sees the exterior and passes judgment upon the character of its owners thereby.

It is a civic duty to have beautiful surroundings for your home, due yourself, your family, and your neighbors.

We have done landscape work in nearly all parts of Texas and know the requirements of every section. We can make you the plan for proper planting, and execute the work, if desired.

For real satisfaction, we believe we can really give the most for the amount invested.

There are ten large contracts closed for landscape work now (January 2, 1917) in Texas, New Mexico and Arkansas. We hope to be able to answer all calls made on us. Page 26 of catalog gives details in regard to landscape work.
